

Project goals

To develop a new curriculum for Circular Furniture Designers that aligns with the principles of circular economy and sustainable design.

To enhance vocational education and training in the furniture sector by updating and upgrading the current offerings related to furniture design.

To foster the sector's transition towards a greener industry and reduce its carbon and environmental footprint.

To meet the demand for skills and knowledge in circular furniture design that is highly sought after in the labour market.

**The Future of Furniture:
Circular Furniture Designers
for a sustainable industry**

About the project

This project, called “FLIER,” is a cooperation partnership in vocational education and training under the KA220-VET program of Erasmus+.

It aims to support the furniture sector in transitioning towards a greener industry by developing a new curriculum for Circular Furniture Designers.

The project duration is 24 months, starting from December 1, 2023.

Who is this project for?

This project is designed for individuals and organizations involved in vocational education and training in the furniture sector. It is relevant for vocational schools, universities, training centers, professionals, and students who are interested in circular furniture design and the sustainable development of the industry.

What do we offer as part of the project?

Development of a new curriculum:
We will create a curriculum for Circular Furniture Designers, focusing on the principles of circular economy and sustainable design.

Pilot course, hackathon, and mobility:
We will conduct a pilot course, a hackathon, and a physical mobility program to validate the results and provide hands-on learning experiences for participants.

Online training course:
We will develop an e-learning platform that offers an open online training course for Circular Furniture Designers. The course will be accessible and interactive.

Trainers' handbook:
We will create a handbook to support trainers in delivering the curriculum and implementing the training course effectively.

Dissemination activities:
We will organize various dissemination activities, including a website, videos, workshops, and a final event, to share the project results and engage with stakeholders in the furniture sector.
